# IRAN'S BALLISTIC AND CRUISE MISSILES

Iran fields the largest and most diverse missile arsenal in the Middle East, with thousands of ballistic and cruise missiles, some capable of striking as far as Israel and eastern Europe. In recent years, Iran has also developed and operationalized the Shahed-131 and -136 advanced unmanned aerial systems (UAS) or cruise missiles, that provide Iran with expanded targeting capabilities. These developments have made Iran's missile force a potent tool for power projection and a credible threat to U.S. and partner military forces in the region. Iran is also an active proliferator, supplying missiles, rockets, and UAS to partners and proxies in Iraq, Lebanon, the Palestinian Territories, Yemen, and Russia.
